Professional summary

Interior Designer and Architectural Design Specialist with over 10 years of experience in residential, commercial, and luxury residential developments. Skilled in interior design, space planning, concept development, technical detailing, and site supervision, with experience delivering projects from initial design through construction and final handover.

Experienced in producing detailed design packages, selecting materials and finishes, and coordinating with architects, engineers, contractors, and suppliers to deliver practical, high-quality design solutions. Familiar with Spanish building regulations, including the Código Técnico de la Edificación (CTE), with an understanding of fire safety, accessibility, and relevant construction requirements.

Led a multidisciplinary team of 5 professionals and contributed to over 25 projects, ranging from €100,000 renovations to developments valued at €10 million, with a strong focus on design quality, budget control, and successful project delivery.

Skills:

Software

Autodesk 3ds Max | AutoCAD | Revit | SketchUp | Lumion | V-Ray | Microsoft Office

Work Experience

Senior Interior Designer / Interior Design Manager

Diplomat Construction & Development Group

Tehran, Iran

October 2016 – 2026

- Led the interior design of luxury apartments, penthouses, and a 40,000 m² residential complex, overseeing projects from initial design through construction and final handover.
- Managed a team of 5 professionals, assigning tasks, reviewing drawings, coordinating design activities, and maintaining quality standards across multiple projects.
- Designed interiors for luxury residences, entrance lobbies, reception areas, communal spaces, and show apartments, creating a consistent design style across each development.
- Developed and reviewed detailed interior design packages, including space planning, furniture layouts, bespoke joinery, construction details, lighting plans, and material specifications.
- Worked closely with architects, structural and MEP engineers, contractors, and suppliers to resolve technical issues and ensure designs were accurately implemented on site.
- Selected materials and finishes, including natural stone, bespoke joinery, and decorative lighting, ensuring they met the design requirements, quality standards, and project budgets.
- Carried out regular site inspections to monitor construction progress, check workmanship, and ensure work followed approved drawings and specifications. Oversaw snagging and final quality checks before handover.
- Managed project schedules, design budgets, and resources across several projects, addressing challenges and keeping senior management informed of progress.
- Presented design concepts, material samples, and project updates to directors and clients, incorporating feedback and obtaining approval for key design decisions.

3D Architectural Visualisation Specialist

RN & Associate Office
Tehran, Iran
May 2013 – August 2016

- Developed high-quality, photorealistic 3D architectural visualisations for over 15 residential and commercial projects, transforming architectural concepts, technical drawings, and design specifications into realistic digital presentations.
- Created detailed 3D architectural and interior models using Autodesk 3ds Max and AutoCAD, ensuring accurate geometry, spatial proportions, furniture layouts, and architectural details.
- Produced realistic interior and exterior renderings using V-Ray, applying advanced lighting techniques, material mapping, texture development, and camera composition to achieve high visual standards.
- Enhanced architectural renderings and presentation materials using Adobe Photoshop, incorporating post-production techniques, environmental elements, and visual adjustments to improve realism and presentation quality.
- Collaborated with architects and interior designers to develop and refine visual concepts, ensuring accurate representation of design intent, material specifications, and architectural characteristics.
- Prepared high-resolution visualisations and presentation packages for client meetings, design reviews, and project approvals, effectively communicating architectural proposals and supporting design decision-making.
- Managed multiple visualisation tasks simultaneously, incorporating design revisions and client feedback while maintaining consistent quality and meeting project deadlines.
- Conducted comprehensive site surveys and existing-condition assessments, undertaking on-site measurements, documenting structural and architectural features, identifying technical constraints, and preparing accurate as-built drawings to inform design development and renovation strategies.
- Prepared detailed interior design and construction documentation, including space planning, furniture layouts, bespoke joinery and cabinetry details, reflected ceiling plans, lighting layouts, and material specifications to support accurate project execution.
- Carried out regular site inspections and construction progress reviews, assessing workmanship against approved drawings, resolving installation and detailing issues with contractors, and overseeing snagging and quality assurance through to final handover.

Education

- Master of Architecture | Azad University of Amoli | 2012
- Bachelor of Architecture | University of Maziyar | 2010
- Diploma in Architecture | Modares School of Architecture | 2005

Training & Certifications

- Advanced Autodesk Training – Málaga (2026)
- Online Workshop in Lighting Design & Spatial Concepts – POLI. design, Politecnico di Milano (2022)
- Specialization Course in Interior Design, Materials & Lighting – Italian Design Institute, Milan (Online, 2023)
- Advanced Material & Lighting Design Workshop – IED Milan (Online Edition, 2021)
